

How to Calculate Your G.P.A.

Grade Point Averages are often used to determine your eligibility for college or university entrance, or for your standing on the honor roll, sports teams, clubs (CJSF, etc.). To calculate your G.P.A., set up three columns. In the first, list your subjects. In the second column, after your subject, write your letter grade. In the third column, record your points as follows:

A = 4 points, B = 3 points, C = 2 points, D = 1 point, F = 0 points

Add up the points of the third column, and divide this by the number of subject you listed. This will give you your G.P.A.

Example:

	<u>Subject</u>	<u>Grade</u>	<u>Points</u>	
1.	English	B	=	3
2.	History	A	=	4
3.	Science	C	=	2
4.	Math	B	=	3
5.	P.E.	B	=	3
6.	Spanish	C	=	2
7.	Health	B	=	3
8.	Technology	A	=	+ 4
				24

$24 \div 8 = 3.0$ G.P.A.

The Hill Classical Middle School Heading

Use it on all papers at Hill Classical Middle School

- Your last names, first name, date, subject and class period go in the upper right-hand corner of your paper, above the first line.
- The title (usually the assignment and page number) should be written on the first line.

EXAMPLE:

○	Husky, Joe Date Subject, Period 3
	Practice Expository Paragraph
